

When trustees and attorneys become electronic filers, they agree to receive documents electronically and waive the right to receive notice by any other means (BR 9036). Previously attorneys, trustees and other parties who received email notification also received paper notices from the Bankruptcy Noticing Center (BNC). The duplication of notices causes additional work for the recipients and is an additional and unnecessary cost to the Judiciary. When a user receives electronic notification, they should not also receive paper notices thru the BNC. Effective **December 1, 2005** registered users of the Electronic Filing System who receive electronic email notification will no longer receive a paper notice from the Bankruptcy Noticing Center (BNC).

Exceptions that will go through the BNC regardless:

- ★ 341 notices, since only the paper version has the full SSN
- ★ notices for EDI partners
- ★ notices for creditors, special mailing groups and US Trustees who are not parties in the case
